# Other issues on digitalisation

## Digital skills & Cybersecurity

- EFESME & SBS are working to provide information, training and tools for many aspects of quickly developing Digital Technologies
- For Digital Skills we cooperate with DigitalSME for possible training focused on Company developments and their protection
- For Cybersecurity we already informed on a chance to “free test” dedicated courses by “CyberWise” to prevent cyber- attacks.
- This involves equipment & tools and mainly human behaviour:  
Two of the biggest challenges for the years to come!
